Goals

To obtain a position within an organization that will utilize my strong work ethic, capability to continually learn and logical thinking skills.

Skills

Technology exposure:

HTML	RxJs	Npm	C#
CSS	Git	NodeJS	Python
Bootstrap	TypeScript	Jquery	MongoDB
JavaScript	Angular	.net Core	Google

Willingness to learn

Adapt to new problems and situations quickly

Love to research in order to find solutions

Good communication skills on multiple platforms

Experience

Revature
Software Engineer, Engineering Analyst
1 year 3 months
Completed a rigorous, intensive 3 month full stack training course. Contracted to Wells Fargo and worked closely with an Agile team to develop and modernize existing code. Primarily developed in Angular.

Education

Stephen F. Austin State University
BS Interdisciplinary Studies, 4-8 Mathematics

Teaching degree that focused on teaching math to middle school students. Much of the coursework gave special attention to problem solving and algorithmic thinking.

Free Code Camp
Full Stack Developer Certification

Self-guided certifications that focused on the basics of full stack development. The coursework included many projects centered around HTML, CSS, Javascript, Javascript frameworks and libraries. 1800+ hours of coursework.
